4500kg

Power
240V/50Hz/1Ph
415V/50Hz/3Ph

Key Features

- Reinforced top extension sleeve
- Full-length overlap extension
- Universal asymmetric/symmetric capability
- High-flow hydraulic pump
- Lift pad extensions & truck adaptors included
- WorkSafe-registered

EU Test Standard

Steel Core Wire
Rope

Japanese/Italian
Oil Seals

Solid Steel
X Construction

Aluminium Alloy Shell
& Copper Core Motor

Drawing on over four decades of hands-on industry experience, P&M Automotive Equipment has designed the Ultimate UL-245S to answer the call for a safer, more capable heavy-duty hoist.

The Ultimate UL-245S is built for Australian workshops needing a reliable, fast and safe 2-post hoist. With a 4.5-tonne capacity and reinforced clear-floor design, it provides excellent access for vans, 4x4s and lifted vehicles. A reinforced top extension sleeve

and full-length overlap extension enhance column strength and load stability. Available in standard or high-reach configurations, the UL-245S offers universal asymmetric/symmetric arm settings to suit a wide range of vehicles. High-flow pumps ensure quicker

operation, while safety-focused wiring and integrated limit switches support dependable performance. WorkSafe-registered and standards compliant, the UL-245S includes lift pads, truck adaptors and optional 240V/15A power, perfect for any workshop.
